Your Network. Your Way.

Graduate Dentist Program

Impression Dental Group's Graduate Dentist Program is a 12-month program focused on creating a seamless transition between university and our practice.

We have partnered with gDR who created 'The Dental Residency' – the most comprehensive program in general dentistry that consists of 21 modules. You will learn from some of the best educators across Australia and New Zealand to enhance your skills, knowledge and clinical confidence.

We will also provide you with a robust mentorship program: 1-on-1 mentorship and support in the practice with our Principal and senior Dentists, as well as monthly mentorship through gDR.

Further to this, Impression Dental Group offers an industry-leading Education Program exclusive to clinicians within our network that you will have access to. You will gain best in class knowledge from industry key opinion leaders in live-to-web events hosted by our Chief Education Officer, Dr Aodhan Docherty.

THE GRADUATE DENTIST PROGRAM AIMS TO:

- Provide a structured and efficient learning environment
- Provide a deep comprehensive understanding of all things general dentistry
- Foster clinical competence, safety and support for growth
- Develop and refine your communication skills
- Deliver hands on training
- Give you the opportunity to learn from industry professionals
- Support your personal and professional growth

Impression Dental Group Education Program

"I am honoured to have the opportunity to support and mentor our graduate Dentists and to help shape them into clinicians that will go on to make a remarkable impact in their own right."

Dr Aodhan Docherty
Impression Dental Group Chief Education Officer

Throughout the year, we will bring you a calendar of world-class speakers who will present on clinical and non-clinical topics. The live-to-web events will be hosted by Dr Aodhan Docherty and you will be able to submit questions in real-time to our presenters. You will have access to the historical library of all of our live-to-web events for your own viewing.

We understand the importance of ensuring that you feel supported which is why you will be able to attend in-person and in-practice workshops as well as have two 6-monthly check-ins with Dr Aodhan himself.

An overview of the program:

WORKSHOPS

The 21 modules in general dentistry from gDR are delivered over the course of a year based in Melbourne.

Residents will learn through both online and in-person lecture content, simulated hands-on workshops and monthly mentor sessions. Each hands-on module will run over a three-day weekend.

ONLINE SESSIONS

To allow as much time as possible to be dedicated to the hands-on workshops, there will be recorded lectures that will run in the weeks leading up to the module, allowing you to be prepared to gain the most from face-to-face time.

IN-CLINIC SUPPORT

Each of our clinics provide support for our new graduate clinicians. Our Principal Dentist and senior Dentists offer different methods for providing in-clinic professional development, mentoring and support.
